

**Beaded Star Pendant**    2004    (From Tir Righ Voided Star Design)

- Glass seed beads
- 100% linen beaded surface
- 100% wool felt padding layers
- 100% glove leather backing
- 100% linen beading & stitching thread

Solidly beaded star design on linen surface. The tight fitting of the beads curved the design and the back was padded out with multiple layers of wool felt in altering sizes to bring the back surface level. Fine glove leather was then cut and fitted over the felt and stitched directly to the beads along the edges of the star. Two top points were left open to have the chain stitched into the backing. This leather was then stitched closed as well.

In the excitement of beading & stitching this design, I put the colours in reverse order. For the Tir Righ voided star the blue beads should have been white and the white beads in the centre should have been blue to show the void. So....I get to keep the sample and will just have to bead more!
